There aren't any pathways available

Additional information

Degree Overview

If you want to make a career in the field of science, this degree is a perfect choice. You will study core interdisciplinary Science courses, including experimental design, maths, biology, chemistry, and ecology. These courses provide the basis for strong skills in scientific investigation, including data collection and analysis, critical thinking, problem-solving, teamwork, and effective communication and ensure versatile graduates. These skills are highly sought after by employers and applicable to many workplaces both within and outside the field of Science.

Building on these core Science courses, you will deepen your study of Science by selecting a Science Stream that matches your interests: Biology & Environment, Environment & Heritage, Human & Medical Science, or Multidisciplinary Science. Each Stream ensures in-depth knowledge and skill development through practical hands-on experience in the classroom, the laboratory, and the field.

Study Reasons

- Graduate job-ready with industry-specific skills and knowledge

- Benefit from a unique, personalised approach to education and pastoral care
- Lecturers are industry professionals and leaders in their field
