- Off-street parking.

## Speciality

**There aren't any pathways available**

## Additional information

## Degree Overview

The Bachelor of Science/Bachelor of Arts double degree gives you the best of both worlds. You will study core interdisciplinary Science courses, including experimental design, mathematics, biology, chemistry and ecology. These courses provide the basis for strong skills in scientific investigation, including data collection and analysis, critical thinking, problem-solving, teamwork, and effective communication. This ensures you will be a versatile graduate. These skills are highly sought after by employers and applicable to many workplaces within and outside the field of Science.

Building on these core Science courses, you will deepen your study of Science by selecting a Science Stream that matches your interests: Biology & Environment, Environment & Heritage, Human & Medical Science, or Multidisciplinary Science. Each Stream ensures in-depth knowledge and skill development through practical hands-on experience in the classroom, the laboratory, and the field.

In the Bachelor of Arts component of this double degree, you will study a Major in an area such as Journalism, Film & Screen Production, Photography, Social Justice, Politics and International Relations, History, or Theatre Studies, which will give you in-depth, specialist knowledge and skills that will allow you to contribute effectively to the cultural and intellectual life of society.

The Arts component will develop your ability to analyse, interpret, deliberate, draw conclusions and communicate. You will be able to consider multiple perspectives and handle ambiguity and uncertainty. These are the skills needed in the 21st-century workplace.

## Study Reasons

- Graduate job-ready with industry-specific skills and knowledge
- Benefit from a unique, personalised approach to education and pastoral care
- Lecturers are industry professionals and leaders in their field
