Additional information

Programme overview:

This world needs for more intelligence. Artificial Intelligence can make people stronger and empower us to reach business goals and improve our lives. Our master programme is an exciting journey to the coming world of AI. It starts from the data, develops analytical and programming skills, goes through the modern statistics and machine learning, leads to better understanding of AI-powered agents and devices, and comes to the ability to create your own, unique AI solutions.

After successful completion of the study programme, you will be able to take positions of:

- Data Analyst
- Data Scientist
- Applied Machine Learning Engineer,
- Analytics Manager/Data Science Leader
- Consultant in the field of Data Analytics and Artificial Intelligence
- Researcher in the field of Data Science etc.
