- Laundry
- Off-street parking.

## Speciality

**There aren't any pathways available**

## Additional information

## Degree Overview

Our combined Bachelor of Laws / Bachelor of Biomedical Science has been designed to be completed over five years of full-time study, allowing you to develop your knowledge in the field of biomedical science and its role within the legal context.

Accredited by the Legal Practice Board of Western Australia, the Law component of your degree places a heavy focus on experiential learning. Designed in conjunction with some of the nation's leading legal experts, this program covers various legal subjects such as Criminal Law, Commercial Law and Conveyancing. As a student in the School of Law, your theoretical knowledge will be bolstered with practical exercises such as mooting, public speaking, dispute resolution, and client interview competitions.

In the Biomedical Science component of your studies, you will have the opportunity to combine the methodologies learned in Law with an understanding of Developmental Psychology, Pathology, Neuroscience and more. Because introducing new biomedical products into the market requires the help of multidisciplinary teams, including research scientists, intellectual property lawyers and clinical trials experts, graduates with knowledge in medicine and law are in high demand.

By completing a Bachelor of Laws / Bachelor of Biomedical Science, you will be able to practise law in the specialist area of health sciences. Alternatively, you may also choose to work in the biomedical industry in regulation, compliance, and intellectual property.

## Study Reasons

- Graduate job-ready with industry-specific skills and knowledge
- Benefit from a unique, personalised approach to education and pastoral care
- Lecturers are industry professionals and leaders in their field
