Speciality

Pathways Available: Pre-Master's

15 months : 3 months pathway + 1 year degree

International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

Develop your skills, knowledge, and understanding of engineering design, medical imaging technologies and the clinical environment whilst learning how to apply, develop, and improve medical imaging and biotechnological products and systems.

You will be trained in electrical, microwave, magnetic, acoustic, and optical techniques relevant to life sciences, along with analytical and imaging techniques relevant for biology, biomolecular, and clinical sciences.

To help you understand biological terminology, you will also receive broad practical training in biology and biomolecular sciences.

Under the guidance of our academic staff, you will undertake a research project where you will have access to the best medical imaging and ultrasound equipment in Scotland, within our Clinical Imaging and Intervention Research Centre.
