Speciality

If your English and / or academic level is lower than what you see above, please contact us. We will do everything we can to find you a great path to university.

Additional information

About the major

A multidisciplinary science major allows students to design their own program of study in the natural sciences. Students choose their areas of specialization from a broad range of sciences, tailoring their studies to their specific interests and career goals.

The multidisciplinary science major is useful to students whose interests do not fit well within a single scientific field, as well as students who wish to pursue advanced degrees in health-related fields.

A little more info

- Multidisciplinary science provides a broader selection of science courses than most undergraduate degree programs.
- Multidisciplinary science majors develop skills that relate to a wider variety of topics, ideas, and experiences.
- Because of the flexibility of the program, multidisciplinary science majors can customize their academic program to suit their individual goals.
