## Degree Overview

Learn about the multiple and complex challenges facing the energy industry, such as decarbonisation, wide scale digitisation, and decentralisation.

In oil and gas corporations, government agencies, and professional services firms, individuals are tasked with articulating the vision of the organisation, sector, or industry. You will learn to assess complex issues requiring close collaboration across similar fields in the social sciences.

You will learn to analyse, synthesise, and articulate concepts and practices relevant to the energy industry. You will understand the fundamental drivers of various energy markets, such as oil, gas, and electric power. You'll acquire foundational and contextual knowledge and skills in management, through classroom and work-based learning, and coaching from specialist academics or senior industry professionals.
