- Mac Pools etc.

Speciality

Our foundation diploma will allow you to understand your professors and the teaching material of the different creative study programmes more in-depth. Obtain a degree that matches your strengths and interests best.

Additional information

Bringing your vision to life

The Illustration programme at the University of Europe for Applied Sciences (UE) combines the classic arts such as painting, drawing and graphic art with the fascination of current design with the help of modern, digital techniques. Illustrations visualize complex content in newspapers, magazines, infographics, advertisements, posters, websites, and apps. They tell stories in picture books and comics and create entire films or virtual worlds in storyboards and concept arts.

In our Illustration programme, you'll explore drawing as both a foundational skill and a cultural tool for communication and idea generation. Guided by internationally recognised artists and illustrators, you'll master a blend of traditional and digital techniques in painting, drawing, and printmaking. Whether creating narratives for books, films, comics, or storyboards, you'll develop your own visual language and experimental approaches.
