Accommodation Costs:

- The Green Village: £85 per week
- Townhouse: £75 per week

Speciality

Pathways Available: Pre-Master's

Sandwich course fees - charged during the placement year away from the University of Bradford for students on thick sandwich courses, or during the year in which the second placement falls for students on thin sandwich courses. Students charged at 10% of the equivalent full-time fee.

If a placement year is to be undertaken abroad and supported by University funding through the University's exchange programmes, fees will increase to 15% of standard fees to cover additional support, advice and administration costs.

Additional information

Degree Overview

This course is taught by staff with extensive crime scene experience who regularly work on a range of operations and are at the forefront of the professional development of the discipline.

The course will:

- Provide you with advanced practical, analytical and interpretative skills in forensic archaeology
- Provide training in discipline skills to enable graduates to pursue careers in Forensic Archaeology and Crime Scene Investigation (CSI)
- Prepare students for careers in non-cognate fields through emphasis on team working and application of a wide knowledge base to problem solving
- This course combines approaches from different disciplines to provide students with a comprehensive forensic skill set.

It is essential that forensic archaeologists are able to appreciate their role within a wider police investigation and have a detailed understanding of crime scene management procedures.

Forensic Archaeology in the United Kingdom is rapidly developing and recognised as a distinct discipline by the Home Office Forensic Science Regulator. Bradford staff have been actively involved

in defining skills matrices for use by the Institute for Archaeologists as part of the process of professional regulation.
