Two main accommodation locations for International Students:

Gorgie: 543 Gorgie Road Edinburgh EH11 3AR

Westfield: 24 Westfield Road Edinburgh EH11 2QB

Speciality

Pathways Available: International Stage One

Additional information

Degree Overview

You will study a range of Modules which are designed to:

Provide a comprehensive knowledge and understanding of the operations and issues inherent in the UK and international financial markets, including issues related to their regulation and control.

Support this knowledge by developing the ability to use relevant theory and analytical techniques in the investigation of financially-centred issues. Instil a sound knowledge of the legal, organisational, financial and technological environment relevant to the sector, and to develop skills in these areas as appropriate.

Integrate learning into an analytical, problem-solving, creative approach in relation to the challenges and changes facing the financial services sector and its role in the wider economy.

Develop inter-personal and transferable skills which will enable graduates to contribute effectively in business situations or in broader policy-making and regulatory environments.

Promote initiative and enterprise by providing opportunities for students to take responsibility for their own learning.

You will be given the opportunity to acquire and develop many valuable practical skills such as the ability to collect, analyse, interpret and understand data and information. On completing this programme you will have been given opportunities to gain an appreciation of the value of education to society and to you as an individual.
