Accommodation

Additional information

Overview

You want to study nursing, apply what you've learned directly in practice, and earn money at the same time. Combine your vocational training (including the nursing examination) with a degree program at our institution.

The nursing profession is shaped by continuous change. Through the close integration of academic study and hands-on training, you will learn how to actively shape the future of nursing.

In our degree program "**Nursing (accompanying vocational training)**", you will expand and deepen the content of your vocational education and learn to analytically reflect on nursing-related phenomena.

Through scientific teaching, you will learn to design nursing practice based on research and evidence.

Career Opportunities

The dual bachelor's degree program in Nursing prepares you — both theoretically and practically — for a successful career across various areas of the healthcare sector.

Selected potential fields of work in nursing include:

- Clinical settings, where you evaluate nursing interventions using empirical methods or apply scientific findings to nursing practice
- Project leadership and management in clinical research or healthcare-related initiatives
- Working as a nursing assessor, consultant, auditor, or quality manager in hospitals, consulting firms, or public authorities
- Employment with a health or nursing insurance provider
- Additionally, the bachelor's degree qualifies you for admission to a master's program
