Additional information

About the Programme

Master's degree programme in Management Information Systems (MIS) cover both business and technology skills and is targeted on preparation of world-class specialists with deep knowledge in modern information and communication technology and utilization of technology in various contexts. Obtained knowledge and skills allows you to become a valuable link between developers of technology and users (community and business). The programme focuses on management of information systems, aspects of change management and use of technology. During classes students are having lectures, practical assignments and case studies provided and supervised by best local and international professors and specialists. Joining the programme today allows you to get international experience provided by invited professors from University of Deusto (Spain), Tokyo University of Electro-Communications (Japan), University of Thessaly (Greece), etc. Upon successful completion of the study programme, you will be able to identify business problems, provide solutions on modern information and communication technologies base, manage and evaluate IT projects.
