## Additional information

## Programme description

Want to work in one of the fastest growing industries in Poland? Are you looking for a field of study that will provide you with a secure future and high salaries? The specialisation Modern Logistics and Supply Chain Management is the perfect choice for you!

Logistics is a key element in the functioning of any company and economy, and the demand for qualified specialists in this field is constantly growing. The Polish TSL industry (i.e. transport, forwarding, logistics) is one of the most dynamically developing in Europe, generating 6% of GDP.

**During your studies, you will gain knowledge in such areas as :**

- **project management in logistics and supply chain** -you will gain the ability to plan, implement and control logistics projects.
- **procurement in logistics and supply chain** -you will learn the role of purchasing in a company, learn how to manage supplier relationships and contracts, and select appropriate models of purchasing organizations.
- **modern trends in logistics and supply chain management** - you will learn about the latest technologies and solutions used in logistics, as well as learn how to build green and circular supply chains.
- **event logistics** - you will learn the specifics of event logistics, learn how to organize onsite and online events, and select the right platforms and tools for projects.
- **events logistics** - you will learn the specifics of international logistics in the European Union, learn how to manage the flow of goods under the conditions of the EU internal market, and learn about the impact of the EU Common Transport Policy on the functioning of the TSL market.
- **compliance in the company** -you will learn to ensure compliance of the company's operations with applicable laws and regulations.
- **psychology in management** - you will understand human behavior in an organization and learn how to effectively lead teams.
- **savoir-vivre in business** - you will learn the rules of appropriate behavior in dealing with customers and business partners.

## Career Perspectives

**Employment prospects (exemplary positions):**

- supply chain manager,
- logistics specialist,
- logistics analyst,
