Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

Focusing on financial economics, you will combine core economic skills with current and fast-changing theories around financial markets.

This degree starts on the same path as our Economics course. It is an MA degree, so is likely to appeal to you if you have a stronger interest in the arts and social science subjects.

Economists examine how societies attempt to make the best use of their scarce resources, so that they can advise governments, individuals, and companies on how to improve decisions and outcomes.

Traditionally, they have advised on investment, production, inflation, interest rates, and prices. Increasingly however economists also examine policies to:

- address climate change

- address inequality

- improve healthcare

You'll learn the techniques to specialise in financial economics, research and forecasting.

Our Economics course focuses specifically on the macroeconomic challenges of national, regional and global economies together with the microeconomic behaviour of people and businesses. An economics degree is an excellent foundation for your career as an economist but also offers scope to pursue a diverse range of high-earning opportunities.
