Pathways Available - International Stage One, International Stage Two (3 years: 1 year pathway + 2 year degree)

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

Finance will always be a popular business subject, given the central role finance plays in all organisations, regardless of size, sector or industry. Finance is also a varied subject, as it contains many different aspects/specialisms, including investment management, risk management, management accounting, portfolio management and much more.

The programme covers a range of applied areas of finance including, financial analysis and simulation, security analysis and portfolio management, plus a broad understanding of the nature of financial markets, institutions and the financial instruments that underpin financial transactions. It also covers key areas such as econometrics, which is to do with statistical and mathematical data/methods, linked to economic decision making. And macro/microeconomics, which are key components of economics and economic decision making. Students will gain the ability to understand financial statements, and a reasonable appreciation of the limitations of financial reporting.

Study Reasons

This course includes an optional eight-week internship matched to your chosen industry. Employers overwhelmingly believe graduates who have an internship experience are more employable due to your increased experience of the workings of international companies and organisations.

The programme also offers students the ability to interpret financial data, including numerical and graphical data. This is a really in-demand skill from employers as the role data plays in our lives increases and finding staff that can interpret and use data is vital.

The programme also offers students the ability to interpret financial data, including numerical and graphical data. This is a really in-demand skill from employers as the role data plays in our lives increases and finding staff that can interpret and use data is vital.
