Speciality

International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

We're interested in existing and emerging digital technologies and the role they play in transforming people's everyday lives.

You will develop the essential skills to identify and respond to people's needs. You will use human-centred approaches to design to find out what people want and how to design the right products for them.

We promote a culture of 'thinking through making' and teach you techniques to prototype throughout the design process. You will have access to a variety of workshops, and you will work with a range of technologies including electronics, computer aided design, laser cutting, and 3D printing. You will also have a dedicated studio space to work in throughout the year.

Study Reasons

Our graduates are employed as product designers, service designers, and interaction designers across the globe for companies such as Lego, Dyson, the BBC, Orange, Nokia, Microsoft, and NCR.

Our graduates have gone on to have successful careers across large and small organisations, in fields

We have strong relationships with employers, including high profile organisations like Microsoft. Throughout the course you will build the kind of product design portfolio that employers are looking for.
