Halls are 10-minutes away from big supermarkets and the train station. Even less is the walk to get to the city centre, full of restaurants, cafes and bars.

### Speciality

### International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

# **Degree Overview**

Mathematical models inform decisions in industry, government, and within economics. Our course combines both pure and application-driven mathematics. By the time you finish your degree, you will be able to use maths to solve practical problems.

You'll explore the relationship between mathematical modelling and economics. You'll also examine how societies attempt to make the best use of their scarce resources.

You'll combine core economic skills with current and fast-changing theories around financial markets. We give you the knowledge and techniques you need for more specialised careers in financial economics, research and forecasting or a future in business management, finance, banking and accountancy.

Advising on investment, production and prices are decisions that people might associate with economists, but they are increasingly asked to advise on:

policies to address climate change policies to address inequality policies to improve the National Health Service many other issues including; marriage, religion, civil war, football hooliganism Our course focuses specifically on the macroeconomic challenges of national, regional and global economies together with the microeconomic behaviour of people and businesses.
