the corporate sector  
local and national government  
planning and policy-making  
the environmental sector  
education  
development.

## **Additional information**

Our BSc Geography gives you the skills and knowledge to understand our changing physical and social environment and how this impacts our contemporary world's challenges. Led by leading researchers in the field, this geography degree will help you discover the multiple connections between space, place, human culture and physical landscapes in which we live, addressing issues such as climate change, the causes and impact of inequalities, and how we live together in an increasingly urban world.

Why choose this course?

Our geography teaching is research-led, offering you a complete grounding in human, environmental and physical geography, as well as developing your skills using Geographic Information Systems (GIS).

We offer several field trips to offer you hands-on experience exploring a variety of themes in human and physical geography.

You will study in a supportive learning environment interacting in small classes with classmates, some of whom are already working in relevant sectors and are keen to share their experience and expertise.
