Program description

Degree awarded: MGM Global Management (Creative Industries and Design Thinking)

The World Economic Forum reports that empathy and collaboration are two critical abilities for global manager success. These are equally critical for those seeking careers in creative industries and industries that use design thinking. These abilities rely on the development of social capital. Students in this program learn to build sustainable, trusting relationships --- the basis of social capital --- with others from diverse parts of the world by developing a deep capacity for intercultural empathy, the ability to have an interpersonal impact and the ability to act with diplomacy. This program is designed to develop a student's social capital through field-based action learning, team-based projects and stretch assignments.

This concentration is offered in collaboration with the Herberger Institute for Design and the Arts.

Inventive thinking. Innovative leadership.

This program can fill the entrepreneurial skills gap that exists among traditional art and design graduates. The National Strategic National Arts Alumni Project survey of over 100,000 art and design graduates indicates that while 77% of architecture graduates and 75% of fine arts graduates believe entrepreneurial skills to be somewhat or very important, only 24% and 21%, respectively, gained the necessary entrepreneurial knowledge and skills as undergraduates.

The MGM program with a concentration in creative industries and design thinking teaches students critical skills with an interdisciplinary focus to meet a current need in the globally expanding field of creative industries. Additionally, providing students with an entrepreneurial skill set strengthens their ability to connect interdisciplinary knowledge of the cultural industries with design thinking methodology, building on management skills and the ability to apply entrepreneurial vision to the globally interconnected sector of art and design. Students are exposed to design-thinking pedagogy as they increase their capacity for interpersonal communication, public communication, opportunity recognition, network and systems thinking, problem recognition and creativity. They demonstrated abilities in cultural leadership, knowledge of the creative industries, distribution of creative products, the creative process and management of innovation in the creative industries.

This program empowers students to advance innovation in the cultural sector, support creative work and careers, harness social capital, and design public and private enterprises that will strengthen arts and design in the future. The program prepares graduates to understand the complex economic,

legal, political and social contexts that surround any innovation or enterprise.

Thunderbird School of Global Management has produced unique leaders for over 75 years --- leaders in every sector capable of tackling the world's greatest challenges. The alumni network comprises 45,000 graduates and 170 chapters around the globe.

Accelerated program options

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Asia Studies (East Asia), BA
- Asia Studies (South Asia), BA
- Asia Studies (Southeast Asia), BA
- Biological Sciences, BS
- Biological Sciences (Biology and Society), BS

Program learning outcomes

Program learning outcomes identify what a student will learn or be able to do upon completion of their program. This program has the following program outcomes:

- Develop the ability to build sustainable and trusting relationships with others from diverse parts of the world.
- Apply design thinking to identify challenges to and opportunities for success in the creative industries.
- Develop the ability to inspire, influence and motivate others in a global world.

Global opportunities

Global experience

Students in Thunderbird's Master of Global Management program have unique opportunities to apply and hone their learning in international settings. Experiential learning exposes Thunderbird students to actual problems faced by leaders of multinational businesses and governmental or nonprofit organizations that operate on an international level. Working with Thunderbird professors, their fellow students, alumni and corporate partners, students master and apply global management principles and concepts to meet real business challenges through special courses, labs and projects. Thunderbird offers a wide variety of experiential learning engagements, allowing students to solve real-world challenges by collaborating with the school's corporate partners around the world. Some options include the following:

Global Field Seminars

This one- or two-week seminar exposes students to the dynamics and nuances of doing business in a focused region of the world. Teams of students go on company site visits and attend high-level meetings and presentations with business, government and cultural leaders as well as with Thunderbird alumni. Students gain invaluable hands-on experience while expanding their global business skills, enabling them to become major assets to any organization they join after graduating.

Thunderbird Global Challenge Laboratories

This is a client-facing, project-based course built on a six- to seven-week immersion assignment in a key emerging or advanced market. Projects take students to destinations all over the world. They are tailored to the business needs of the client and challenge students to provide sophisticated data and market analysis, strategy recommendations and plans for sustained growth that are both practical

and effective. For more information, students should visit the Thunderbird Global Challenge Lab website.

Career opportunities

Career examples include positions as:

- intelligence analysts
- instructional designers and technologists
- management analysts
- marketing managers
- market research analysts and marketing specialists
- sales managers
- social and community services managers
