Speciality

This degree is validated by the British Computer Society which is the Chartered Institute for IT.

IY0 (Engineering and Computer Science)

Additional information

Degree Overview

This degree will not only equip students with practical skills, but also a deep understanding of the underpinning theory. Graduates from this course join industries in software development, database administration, network administration or similar positions. After graduation students should be able to obtain a good job in the computing industry in the UK or indeed with any of the international computing firms; or take up study for a higher degree such as a Masters Degree or PhD, both also offered at Bangor. During this course, students will learn the fundamentals of computer science and advanced programming skills, and benefit from teaching that relates to the research interest of the academic staff. Specialities available during the course include computer graphics, artificial intelligence and agents, and data communications.

Study Reasons

Bangor University offers a lively community with well-equipped laboratories, networked computers using industry-standard software and its own library.

Bangor University research and other interactions with industry ensure that our courses reflect recent developments. Staff are practising professionals, who work on joint projects and act as consultants to the industry.
