Pre-master's (Business and Management)

Additional information

Degree Overview

An MBA is now a globally recognised qualification for senior personnel and executives within both the private and public sectors. As the impact of change, the importance of strategy and intensification of competition increases, organisations are demanding managers who can contribute a depth of understanding in the business community as a whole. The growing economic importance of entrepreneurship has also re-emphasised the need for a clearer understanding of the theory and practice relating to business and management in both new and existing organisations.
