Additional information

In the B.Sc. Web Development programme you will learn to conceptualise, design and develop real, digital products and services. Interaction design, UX design, usability engineering, script languages, business informatics and social media are on the curriculum as well as hardware programming, communication strategy and agile project management. Based on this, you will develop digital experiences, online platforms, hardware projects, virtual spaces and games.

The focus is exclusively on sustainable projects that work with large companies, NGOs, institutes, universities or start-ups to achieve sustainable development for society as a whole.

You will learn how to coordinate real projects, work in teams with content experts, communication designers and marketing experts, advise clients, derive concepts from ideas and finally design and technically implement them. Our students work on assignments for clients from all over the world during their studies - an ideal preparation for the start of a professional career.

In media agencies, medium-size and international enterprises various doors are open, for example to software developers, consultants, game designers, app developers. You will also be well prepared for the leap into self-employment.

With the completion of your studies you have what it takes to be a:

- UI/UX Design Expert
- Full Stack Developer
- Frontend Designer
- Service Design Thinking Expert
- Web Developer
- IOT Hardware-Based Coding Expert
- Software Engineer
- Content Manager
- Project Manager Digital
- Game Developer / Game Designer
- Social Media Engineer
- E-Learning Expert

In addition, you have access to numerous postgraduate and Master's programmes in Germany and abroad
