

# Arizona State University (Polytechnic Campus)

## Psychology, BA

### Study details

**Course type:** Bachelor's degree

**Degree:** Psychology, BA LSPGSBA

**Study mode:** Full time

**Duration:** 48 Month

### Cost of study

**Cost :** 35 430 USD

**Reg. fee :** 85 USD

**Scholarship :**

**Insurance :** 2 765 USD

### Intake/s

Jan/May/Aug

### Requirements

#### Academic requirements

First-year students must:

- Have a 3.00 grade point average (GPA) (a "B" or better where "A"=4.00) from a secondary school. Some ASU programs may have higher admission or English proficiency requirements and may consider a minimum ACT or SAT score.
- Must have three years of high school coursework. (If you are currently in high school, ASU needs to see 9–11 grade coursework. If you have completed high school, ASU needs to see 10–12 grade coursework.)
- Must have and present a completed high school diploma or certificate.

#### Conditional admission

ASU may offer conditional undergraduate admission to international applicants to an on-campus program who meet the academic (aptitude) requirements but who are not proficient in English. This offer of conditional admission will give you time to improve your English proficiency before you start classes at ASU. Your conditional admission offer is good for up to three semesters, during which time you must meet one of these requirements to begin your ASU experience.

#### Competency requirements

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).

- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

## **Provide evidence of English language proficiency (TOEFL 61)**

### **Accommodation**

Provided by partner agencies

### **Additional information**

#### **Program description**

Psychology is the scientific study of mind and behavior.

The BA program in psychology emphasizes critical thinking, empirical research methods and writing, and adds practical experience through internships, service-learning and faculty-supervised research. The Bachelor of Arts program provides a broad foundation in psychology and affords students the flexibility to choose from a variety of courses outside the major.

Students have the opportunity to participate in faculty-led research labs on a wide range of topics, including:

- PLENA Research Lab. <https://www.plenaresearch.org/>
- Couples Coping with Stress Lab. <https://ashleykrandall.wixsite.com/asucouplescoping>
- Tran Ethnic and Minority Psychology and Experiences (TEMPE) Lab. <https://sites.google.com/site/tempelab/about>

### **Concurrent program options**

Students pursuing concurrent degrees (also known as a “double major”) earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

### **Global opportunities**

#### **Global experience**

Study abroad students are exposed to unique differences in the human condition worldwide, are able to improve language and cross-cultural skills for effective communication, and are challenged to adapt under new social and cultural circumstances. Participating in one of the more than 300 Global Education programs provides an opportunity for students to develop a valuable skill set that can give them an advantage in their career and provide personal enrichment. Whether in a foreign country, in the U.S. or online, Global Education programs encourage students to build communication skills, challenge them to adapt and persevere, expose them to differences across the world and increase their ability to work with diverse groups of people.

### **Career opportunities**

The Bureau of Labor Statistics shows that projected job growth (2022 to 2032) for psychologists is 6%, which is faster than average.

A degree in psychology prepares students for a career in a variety of settings:

- consulting firms
- government (sales and marketing, human resources, research, administration, management)
- hospitals
- industries and organizations
- mental health agencies
- social services (high school psychology teacher, occupational analyst)

The degree also provides an excellent foundation for graduate study in fields such as public administration, law, family studies, communication and the various graduate program fields in psychology:

- clinical and counseling
- cognitive neuroscience
- developmental
- environmental
- health
- physiological
- social
