Cost of study

Cost : 35 430 USD

Reg. fee : 85 USD

Scholarship :

Insurance : 2 765 USD

Intake/s

Jan/May/Aug

Requirements

Academic requirements

First-year students must:

- Have a 3.00 grade point average (GPA) (a "B" or better where "A"=4.00) from a secondary school. Some ASU programs may have higher admission or English proficiency requirements and may consider a minimum ACT or SAT score.
- Must have three years of high school coursework. (If you are currently in high school, ASU needs to see 9–11 grade coursework. If you have completed high school, ASU needs to see 10–12 grade coursework.)
- Must have and present a completed high school diploma or certificate.

Conditional admission

ASU may offer conditional undergraduate admission to international applicants to an on-campus program who meet the academic (aptitude) requirements but who are not proficient in English. This offer of conditional admission will give you time to improve your English proficiency before you start classes at ASU. Your conditional admission offer is good for up to three semesters, during which time you must meet one of these requirements to begin your ASU experience.

Competency requirements

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).
- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

Provide evidence of English language proficiency (TOEFL 61)

Additional information

Program description

Counseling and applied psychological science is a practical specialty that promotes psychological well-being.

The sports performance counseling concentration of the BS program in counseling and applied psychological science provides foundational training in the psychology of performance and related counseling theories and skills that is geared toward professionals in a wide range of fields.

This program prepares graduates to support licensed professionals in counseling and counseling psychology; it also readies them for graduate study in counseling psychology, sport psychology, counselor education and other fields. Additional education is required for students who wish to become licensed professionals, teachers or professors.

Concurrent program options

Students pursuing concurrent degrees (also known as a “double major”) earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Global opportunities

Global experience

To make a positive impact in the lives of others, students must understand the diverse set of experiences, backgrounds and cultures that shape the people with whom they wish to work. When studying abroad, students gain firsthand experience of a wide range of cultures and communities. Global Education programs provide students with a unique global perspective that enables them to impact the world.

Career opportunities

Graduates are able to assist licensed mental health counselors and psychologists in providing services that focus on mental health and optimal performance.

Such employment is found in a variety of settings, including community centers, the corporate world, educational institutions, independent consulting, social service agencies, and sports, and in behavioral health care delivery settings such as community agencies, hospitals and rehabilitation centers.

Career examples include:

- athletic coach
- behavioral health technician
- educator
- human services worker
- life skills instructor
- mental health professional
- mental performance coach or consultant for athletes, first responders and military personnel
- performance consultant for the arts, industry and the services sector
- trainer for human resources, sales and marketing, and career transition
- youth counselor

According to the U.S. Bureau of Labor Statistics, mental health counselor is one of the fastest growing occupations with 18% employment growth projected from 2022 to 2032.
