### Additional information

## Degree Overview

If you have a HND/DipHE qualification, this programme allows you top-up your qualifications to a full degree, giving you access to more graduate career opportunities. This one-year top up programme is designed to provide a firm understanding of computer science. It will equip you with the skills you need for a successful career in the sector. A degree in computer science is a gateway into nearly every industry. Technological advances have created a requirement for organisations across all sectors and industries to employ people who are competent, fluent and experienced in multiple areas of computing. The programme has been constructed to give you experience of professional work culture while you study, focusing on collaborative working practices in technology and using team based project management software, such as Scrum and Kanban, that allows people to work together to deliver software for people. By studying in this way, you will learn what makes a

responsible computer practitioner in legal, social, ethical and professional contexts. It has been designed for students who want to work in the evolving modern technology world. You will be taught by experts at the forefront of research with experience in industry, ensuring you are provided with the latest knowledge and skills in this fast-moving sector.
