Degree overview:

The Extended Masters The Extended Masters courses have all been designed to support international students with a minimum of IELTS 5.5 (5.0) on their journey to postgraduate study. Students will receive ongoing support through their transition to the UK. Our Extended Masters courses are aimed at international students looking to:

- Enhance their existing skillset
- Progress on to master's-level study
- Improve their English Language skills

Why study this master's in Project Management??

- Develop a deep understanding of the principles, concepts and methodologies of project management
- Equips you with the skills and tools needed to plan, execute and manage complex projects
- Provides a critical understanding of the role of project management in organisational strategy, governance and performance
- Learn to align project objectives with organisational goals
- Develop the leadership and interpersonal skills to lead teams effectively
- Learn to manage projects in a global, multicultural and digital environments

In today's fast-paced and competitive world, effective project management is essential for achieving successful outcomes. Throughout this course, you will explore various project management methodologies and techniques, and learn to apply them to different project types and contexts. You'll develop essential project management skills, such as planning, scheduling, budgeting, risk management, quality management, and stakeholder management. Through case studies, simulations, and hands-on exercises, you will learn how to analyse and solve real-world project management problems. The course is taught by industry experts and offers opportunities for real-world project experience through partnerships with leading companies. How you will study This course is comprised of five semesters. In the first two semesters, English language constitutes 35% of the course, and students successfully completing the first two semesters of the course are expected to be able to demonstrate English language skill at the CEFR B2 level (IELTS 6.5). Upon successful completion of the first two semesters, students will move onto the core progression course

Study reasons:

- The course is taught by industry experts
- Offers opportunities for real-world project experience through partnerships with leading companies
