Additional information

Degree Overview

The world more than ever before is in need of flexible and prepared thinkers, ready to build financially robust businesses that are able to deal with the unexpected and cope in a crisis. This degree will build on strong analytical skills, exploring the economics of markets such as money, capital, derivatives and foreign exchange, and the theory of modern finance in business.

You'll have the opportunity to choose a range of modules throughout your course, such as Crisis and Business Continuity Management, where you will learn to analyse vulnerabilities and deal with simulated business interruptions. Explore the top-level decision making in managing the direction and impact of organisations with modules on Management and Strategy.

You'll learn to grow a deep understanding of accounting through the joint honours degree which will enable you to appraise the role of accounting in society. Appreciate and critically analyse financial decisions taken by organisations, and the standards, laws, rules and regulations that qualified accountants must abide by.

Throughout this degree programme academic specialists and professionals will expand your understanding of business concepts, ideas, models and methods, with strong focus on strategic management. This valuable expertise will help you to stand out in roles in corporations, finance, and the civil service, in the competitive business world.

Study Reasons

The opportunity to gain a practical insight into markets and trading with DMU's Trading Room, which gives you access to industry standard software to analyse share prices and company performance.

A degree in Accounting with Business Management opens a wide range of career opportunities as you develop a broad base of skills that are in great demand with employers.

You may choose to specialise in a discipline that you enjoyed studying on the programme such as management, business or accounting.
