International Foundation Certificate | International Year Zero

Additional information

Degree Overview

As part of a multibillion-pound film and television industry, studying the creative and technical skills used in visual effects can open up extensive career prospects.

This degree programme also encourages you to develop your creative flair and understanding of industry-standard software to create your own 3D content for use in film and television projects.

Graduates of this course have gone on to work in roles such as composers and matte painters, as well as wider media-based roles such as colourists and finishers.

Study Reasons

DMU's VFX facilities include high-definition mixed media workstations, using industry-standard software such as 3ds Max, Maya, Nuke, After Effects and DaVinci Resolve.

The chance to learn about a range of topics including VFX and compositing basics, 3D modelling and animation, match-moving and MOCAP (motion capture), and tracking rigging and compositing.

Work placements are offered as part of this course and can boost your skills and experience while studying, as well as improving your chances of gaining a graduate level job.
