Speciality

Placement fee: £1,850

Pathways Available

International Year Zero

Degree Duration

4 years : 1 year pathway + 3 year degree

5 years : 1 year pathway + 4 year degree - with placement

Additional information

Degree Overview

This accredited by the Royal Society of Biology course is a research-led degree, ideal for careers in the medical and healthcare professions or laboratory science. It integrates scientific research and clinical skills to develop your understanding of the human body in health and disease.

This course is taught by experienced, research-active academics and clinical experts who will present the latest advances in medicine and science, and study a range of topics, including Biochemistry, Cell Biology, Inflammation and Immunobiology, Cancer Therapeutics and Nutrition Through the Lifespan. As the course progresses, you will be introduced to more advanced medical topics, and start to relate the understanding of normal healthy physiology with pathological processes.

On this programme you can choose to enhance your employability through an optional sandwich year work placement, allowing you to gain hands-on experience and develop practical and professional skills that you can apply to your learning.

Graduates of this course have pursued careers in scientific research, teaching and medical writing, and upon completion you can also choose to progress to graduate entry medicine and dentistry courses.

Study Reasons

Royal Society of Biology accredited course, so you can graduate with the skills and qualifications sought by employers.

through this course, you can gain industry experience through an optional sandwich-year placement, with past students securing roles at B. Braun Medical Limited, Merck, Sharp and Dohme.
