Additional information

Degree Overview

This BEng Computer Engineering offers the chance to create applications for robots, embedded and real-time systems, and other innovative information and communications technology. Through this course you will learn about theoretical programming and gain practical experience in developing applications for computing platforms and hardware. This course is accredited by the Institution of Engineering and Technology on behalf of the Engineering Council. Graduates from this course have gone into fields that include professional roles in computing, engineering and related specialist fields. You could also pursue postgraduate study.

Study Reasons

- Through this course you'll experience our research-led delivery from computer security to the Internet of Things
- This course is accredited by the Institution of Engineering and Technology on behalf of the Engineering Council.
- You will gain the knowledge and skills required for professional roles within computing, engineering and related specialist fields. For example, you could work as a professional engineer in a variety of organisations or start your own business.
