- Sports Field and Grounds.
- Catering On-Site.

Accommodation Fees

£163.00 to 210.00 pw

Speciality

There aren't any pathways available

Additional information

Degree Overview

You'll be part of a unique and exciting dual-field programme, where you'll learn the required skills to succeed as both an Adult Nurse and a Mental Health Nurse. You will have the opportunity to shape your learning experience while being taught by expert clinical and academic staff in new teaching facilities and on a wide range of clinical placements. You will receive excellent support to ensure you achieve both academic and professional success. On successful completion of the course you will be eligible to apply for registration with the Nursing and Midwifery Council (NMC) as an Adult Nurse and also a Mental Health Nurse. Your learning on the programme will be split between theory in the classroom and clinical practice in a range of placements and in the Clinical Simulation Centre (CSC). You'll develop your theoretical knowledge through lectures, seminars, group work, guided

independent study, online learning, reflective practice and a variety of assignments. In year 4 you'll also undertake an independent project to extend and apply your research and analytical skills. You'll gain practical skills and experience through a range of mental health and adult nursing placements, such as community mental health teams, inpatient mental health services, primary care (general practice), community nursing (district nursing), hospices, care homes and acute hospitals. You will be supported, supervised and assessed during placements by both clinical and academic staff. You will also spend a significant amount of time learning in our new Clinical Simulation Centre (CSC). These brand-new facilities include realistic community and in-hospital settings. Here you will safely practise clinical skills with other students, service users, carers, role players and hi-tech patient simulators under the guidance of experienced clinical and academic staff. You will also have the opportunity to organise an elective placement in the UK or abroad.

Study Reasons

- MSci Adult and Mental Health Nursing at Roehampton has been developed in response to emerging nursing roles operating across traditional boundaries between health and care services.
- You will be able to work in a wide variety of roles in mental health, adult and integrated services, such as community mental health teams, inpatient mental health services, community nursing teams, primary care, care homes, hospices, private and independent sector organisations and more.
- With skills and confidence in addressing the parity of esteem between physical and mental health, we are aspirational that MSci graduates will be highly sought after by employers and will become leaders in this area.
