Course type: Bachelor's degree

Degree: Health Care Administration and Policy, BS NHHCDBS

Study mode: Full time

Duration: 48 Month

Cost of study

Cost : 35 430 USD

Reg. fee : 85 USD

Scholarship :

Insurance : 2 765 USD

Intake/s

Jan/May/Aug

Requirements

Academic requirements

First-year students must:

- Have a 3.00 grade point average (GPA) (a "B" or better where "A"=4.00) from a secondary school. Some ASU programs may have higher admission or English proficiency requirements and may consider a minimum ACT or SAT score.
- Must have three years of high school coursework. (If you are currently in high school, ASU needs to see 9–11 grade coursework. If you have completed high school, ASU needs to see 10–12 grade coursework.)
- Must have and present a completed high school diploma or certificate.

Conditional admission

ASU may offer conditional undergraduate admission to international applicants to an on-campus program who meet the academic (aptitude) requirements but who are not proficient in English. This offer of conditional admission will give you time to improve your English proficiency before you start classes at ASU. Your conditional admission offer is good for up to three semesters, during which time you must meet one of these requirements to begin your ASU experience.

Competency requirements

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).

- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

Provide evidence of English language proficiency (TOEFL 61)

Additional information

Program description

Students in the BS program in health care administration and policy study the design of health care systems, processes, leadership and management. This knowledge can be used to optimize how health care is delivered to improve health for all.

Students will gain foundational knowledge of health care administration and health policy grounded in concepts of leadership, economics, finance, social determinants of health, informatics and systems engineering. Faculty are multidisciplinary tenure-track and clinically trained professionals who work together to create, teach and share knowledge.

Graduates of this program are academically prepared, well-rounded and adept in skills necessary for a number of exciting careers in health care administration, policymaking and management.

Concurrent program options

Students pursuing concurrent degrees (also known as a “double major”) earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Global Management, MGM

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program.

Global opportunities

Global experience

Studying health care administration and policy abroad enables students to develop valuable skill sets. Being exposed to unique health environments, learning culturally specific health approaches, and

improving intercultural communication skills help prepare students to lead, giving them an advantage in their professional careers.

Career opportunities

Job opportunities may include entry-level positions in health care administration, hospital administration, program management, policy, advocacy, system design, quality improvement and health services research.

Graduates may pursue further education through graduate programs in areas such as health care delivery, population health, administration and management.
