Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

We live in a world where business operations are becoming increasingly global in scale. National boundaries now matter very little to decisions about where goods are made and services provided.

By studying international business you will understand how this has come about, and what it means for today's business world.

This degree has economics at its core, covering micro and macroeconomics, but it is much broader than a standalone economics degree. It analyses the major external factors effecting global business, globalisation and applied policy.

Understanding the environment has never been more important. Our modern world uses a lot of energy, generates waste and pollution, degrades our environment, reduces biodiversity, and affects our health and welfare.

Environmental sustainability examines the interaction between people and their surroundings. You'll learn about the use of natural resources and how we can attain more sustainable lifestyles.

It can help you:

tackle pollution

ensure that new developments enhance rather than detract from their surroundings

offer communities the chance to have a real say in how people use their natural resources
