- Television room
- Laundry
- Off-street parking.

### Speciality

**There aren't any pathways available**

### Additional information

## Degree Overview

Communications and media are an exciting and inescapable part of modern life. With the advent of social media, the 24-hour news cycle, the development of citizen journalism, and the multiplatform delivery of film and screen production, the traditional media landscape has changed beyond recognition. This has presented new opportunities and avenues of communication for filmmakers, journalists, photographers and other media practitioners.

In the Bachelor of Communications & Media component of this double degree, you'll explore the principles and techniques of communications and media by examining and creating print, non-print and multimedia texts using traditional, new, and emerging media technologies. Our degree provides you with a unique opportunity to learn about journalism, film and screen production, digital communication, photography and much more. This program teaches you how to develop communication and media strategies and skills using contemporary techniques suitable for many types of workplaces.

You must complete a Major in either Journalism, Film and Screen Production, or Photography. Then you can study four extra courses in one of the other three Major areas or a complementary area from

a range of humanities, science and social science disciplines – the choice is yours. See the Program Requirements below for specific details.

The Bachelor of Behavioural Science is a unique program that combines elements of psychology, political science, cultural studies and sociology. Integrating specialised knowledge developed in these social science disciplines and with a strong focus on critical psychology, the program forges a connection between traditional psychology and social work. As a graduate, you will be equipped with the skills and knowledge to work with those who may be experiencing marginalisation or disadvantage.

As part of the Behavioural Science component, you will complete 12 Behavioural Science courses, including an internship which offers you the chance to apply your theoretical knowledge and learn much more in a professional workplace.

## Study Reasons

- Graduate job-ready with industry-specific skills and knowledge
- Benefit from a unique, personalised approach to education and pastoral care
- Lecturers are industry professionals and leaders in their field
