

Arizona State University (Tempe campus)

Anthropology, BA

Study details

Course type: Bachelor's degree

Degree: Anthropology, BA LAASBBA

Study mode: Full time

Duration: 48 Month

Cost of study

Cost : 35 430 USD

Reg. fee : 85 USD

Scholarship :

Insurance : 2 765 USD

Intake/s

Jan/May/Aug

Requirements

Academic requirements

First-year students must:

- Have a 3.00 grade point average (GPA) (a "B" or better where "A"=4.00) from a secondary school. Some ASU programs may have higher admission or English proficiency requirements and may consider a minimum ACT or SAT score.
- Must have three years of high school coursework. (If you are currently in high school, ASU needs to see 9–11 grade coursework. If you have completed high school, ASU needs to see 10–12 grade coursework.)
- Must have and present a completed high school diploma or certificate.

Conditional admission

ASU may offer conditional undergraduate admission to international applicants to an on-campus program who meet the academic (aptitude) requirements but who are not proficient in English. This offer of conditional admission will give you time to improve your English proficiency before you start classes at ASU. Your conditional admission offer is good for up to three semesters, during which time you must meet one of these requirements to begin your ASU experience.

Competency requirements

International students who completed high school outside the U.S. are required to meet the following competency requirements:

- Math: four years (algebra I, geometry, algebra II and one course requiring algebra II as a prerequisite).

- Laboratory science: three years total (one year each from any of the following areas are accepted: biology, chemistry, earth science, integrated sciences and physics).

Provide evidence of English language proficiency (TOEFL 61)

Accommodation

Provided by partner agencies

Additional information

Program description

Anthropology is the study of what it means to be human, in the broadest possible terms.

The BA program in anthropology helps students recognize and solve problems facing the contemporary world through a broad understanding of humanity. Working alongside leading faculty, students gain experience as apprentices on research projects. Students also have opportunities for hands-on learning through study abroad programs and field schools.

This interdisciplinary program offers training in the main areas of anthropology, including archaeology, bioarchaeology, sociocultural anthropology and evolutionary anthropology.

Students enrolled in this program may not pursue a concurrent BS in anthropology or Bachelor of Arts in global health, but they may add a minor in global health to complement the core curriculum. The Bachelor of Arts in anthropology is primarily for those whose interests lie in society, culture and archaeology, while the Bachelor of Science is primarily taken by students interested in science and mathematics-based courses.

Concurrent program options

Students pursuing concurrent degrees (also known as a “double major”) earn two distinct degrees and receive two diplomas. Working with their academic advisors, students can create their own concurrent degree combination. Some combinations are not possible due to high levels of overlap in curriculum.

Accelerated program options

This program allows students to obtain both a bachelor's and master's degree in as little as five years. It is offered as an accelerated bachelor's plus master's degree with:

- Global Health, MS

Acceptance to the graduate program requires a separate application. Students typically receive approval to pursue the accelerated master's during the junior year of their bachelor's degree program.

Global opportunities

Global experience

Study abroad students often cite participation in Global Education programs as the highlight of their academic career and a crucial moment in helping them gain a clearer view of the world, its peoples and the complex challenges facing everyone.

The School of Human Evolution and Social Change offers a suite of faculty-directed Global Education programs designed to connect students with real-life issues that impact local communities yet transect borders. Through any of the more than 300 programs available, students can see the world as they never have before and come away with memories to last a lifetime.

The College of Liberal Arts and Sciences recommends these programs for students majoring in anthropology.

Career opportunities

Graduates have the knowledge and skills they need to find jobs in fields where understanding complex human behavior is important.

As the many spheres of human interaction expand globally, people trained in anthropology are increasingly in demand for their broad, holistic knowledge and perspectives and their ability to evaluate and interpret complex problems and work effectively across cultures and languages.

Career opportunities include positions as:

- cultural consultants
- curators
- emergency responders
- health care administrators
- nonprofit leaders
- policy analysts
- program directors
- refugee legal advocates
- researchers and professors
