### Accommodation Additional information

## Overview

The B.A. Automotive Technology and Management combines technical knowledge and management skills specifically tailored to the automotive industry.

In the area of ??technology, students learn the importance of cooperation between automobile manufacturers and suppliers for cost control, quality and delivery reliability.

You will also gain insights into future vehicle technologies. The management part deals with megatrends such as energy, environment and safety and how these influence the manufacturers' sales structures.

The course prepares you for the challenges in the automotive industry and opens up ways to actively shape the future of mobility.
