Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

The Earth is facing major environmental challenges such as climate change, loss of biodiversity and over-exploitation of natural resources.

Addressing these issues requires effective legal and policy tools, internationally, nationally, and locally. The course will offer you a broad range of knowledge, covering the structures, principles, and institutions of environmental law, both at the domestic and the international levels.

You will develop the skills needed to pursue a career in this area of law and policy. Knowledge of environmental law is increasing relevance for the commercial world.

This course gives you an understanding of the main legal issues related to environmental protection and sustainable development. The choice of modules and dissertation topics allow you to focus on the environmental and sustainability issues that are important to you.
