Speciality

International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Pathways Available - International Stage One

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

You will study both pure and application-driven mathematics. By the time you finish your degree, you will be able to use maths to solve practical problems. Computers are used extensively in modern maths and we will introduce you to various mathematical software preparing you for industry.

Our course will allow you to deepen your knowledge of mathematical techniques supporting industry, science, engineering, commerce, finance, and education. You will also develop your analytical skills to an advanced level.

Your maths skills will come in useful for analysing the statistical data that we use in the Psychology modules.

Psychology is the scientific study of the mind and behaviour. Topics we cover include how babies learn, the way in which people's mental skills change as they grow older, personalities types, and social group dynamics. You will also study different psychological disorders.
