Speciality

Pathways Available: Pre-Master's

15 months : 3 months pathway + 1 year degree

International College Dundee

If you do not meet our academic grade requirements for your chosen course, we can offer you an alternative route to begin your studies. Our international incorporated degrees will develop your subject knowledge, academic English and university level study skills.

Tuition fees for International students will increase by no more than 5% per year for the length of your course.

Additional information

Degree Overview

You will study a range of modules, including software development, database systems, software engineering, and human-computer interaction, allowing you to gain a comprehensive understanding of the subject.

Our regular seminars and guest speakers allow you to learn from those working within the industry, increasing your understanding of real life situations you could face in your career.

You will also have access to a range of conventional and specialised equipment and software, such as Windows Azure, Teradata, and Tableau, helping to further develop your skills and understanding.

Under the guidance of our academic staff, you will undertake a development project based on your own interests. Recent projects examples have looked at the estimation of blood vessel widths in images of the human retina and exploring the potential of virtual reality in software design.

This is a conversion degree so you can change career or become qualified in a discipline which is not related to your undergraduate degree. Have a look at our other Computing conversion degrees:
