Additional information

Empowering Global Health Leaders

The Master's degree programme in International Public Health Management is based on the idea of providing an interdisciplinary, international and research-oriented management education for planning, development and controlling tasks in the public health sector. The degree programme aims to impart qualifications which, in the sense of entrepreneurial thinking and acting, prepare students for the future requirements of a top management position in the public health sector with leadership and management responsibility.

The programme applies basic business administration and management skills (HR, Finance) to the specifics of the public health sector and combines them with core skills (health prevention, epidemiology) and complementary skills (research methodologies, CSR). The MSc in International Public Health Management focuses on the provision of a multidisciplinary, critically analytical and practice-based approach to the main challenges and issues in international public health management, planning and policy, which face the providers of health and health-related services.

Career Perspectives

Upon graduation, students of the M.Sc. in International Public Health Management are equipped with a diverse skill set that opens up numerous career opportunities in various sectors of the healthcare

industry. With comprehensive knowledge and expertise in public health management, graduates can pursue leadership positions both locally and internationally. They are well-prepared to take on roles such as Health Care Manager, Account Manager for clinics, Consultant for occupational health management, Healthcare management consultant, and Quality Manager. Additionally, given the program's focus on project management and public health administration, graduates are also suited for positions in public health organizations and governmental health agencies. With their versatile skill set and in-depth understanding of healthcare management principles, graduates are poised to make significant contributions to improving healthcare delivery and promoting population health on a global scale.
