Additional information

Further information

During your studies, you will gain skills that are necessary to manage logistics, transport and business relations in an efficient manner. You will explore modern tendencies and innovative methods of supply chain management as well as out-of-the-box ways of solutions that can be applied in the Transport-Shipping-Logistics industry.

Throughout your studies, you will **acquire knowledge** that will prepare you for the work in divers economics sectors, such as logistics, production and transport companies as well as distribution centres. In the world that is becoming more and more globalised, where the optimisation of logistical processes is the key to success, the demand for qualified specialists in this field is constantly growing. That is why training in logistics opens up a wide range of professional opportunities, and provides stability in the job market.

By developing the key skills of the future, our offer responds to the current challenges of the labour market. During classes, you will learn practical skills such as teamwork, career planning and interdisciplinary problem solving. You will be able to gain practical industry knowledge by participating in **semester and interdisciplinary projects**.

The curriculum covers both obligatory courses taken by all students and specialisation courses which are individually chosen for each specialisation. Among obligatory courses, you can find for example: Information technology, Supply logistics, Production and service management, Logistic infrastructure, Logistics strategies, IT systems in logistics and Controlling in logistics.
