Additional information

Degree Overview

This MBA programme is aimed at future healthcare leaders wanting to examine existing health systems and practices around the world, as well as explore the impact of innovations and rapid technological development on healthcare. The core modules of this programme provide a thorough grounding in essential and practical managerial skills, such as change management, strategy, marketing, finance, and leadership. You will also develop an understanding of advanced problem

solving techniques and methodologies for conducting applied research. This is critical for providing evidence for your leadership decisions. A range of assessments will be used including digital portfolios, consultancy projects, and presentations. Emphasis will be placed on your ability to apply skills learnt during the module towards real world challenges you may face in the workplace.

Study Reasons

- This programme is dual accredited to a CMI qualification
- After completing this course, students will be able to apply for managerial roles at various healthcare institutions including hospitals, clinics, care homes, charities, and digital health organisations or go into a research pathway within academia.
