**Pathways Available** - International Stage One

**Tuition fees for International students will increase by no more than 5% per year for the length of your course.**

## Additional information

## Degree Overview

This degree starts out on the same path as our Economics degree. Following this MA route, you will have a stronger interest in the arts, social science subjects. This particular degree is offering you the chance to develop your Spanish language skills.

Economists examine how societies attempt to make the best use of their scarce resources, so that they can advise governments, individuals and companies on how to improve decisions and outcomes.

Advising on investment, production, prices are decisions that people might think of, but economists are increasingly asked to advise on:

policies to address climate change

policies to address inequality

policies to improve the National Health Service

many other issues including; marriage, religion, civil war, football hooliganism etc.

Our Economics course focuses specifically on the macroeconomic challenges of national, regional and global economies together with the microeconomic behaviour of people and businesses. An economics degree is an excellent foundation for your career as an economist but also offers scope to pursue a diverse range of high-earning opportunities.
