Dormitory - 1 000 EUR per month

Additional information

The B.A. Photography programme will teach you how pictures work and what they can achieve. You will learn how to design and stage information using analog and digital image recording techniques. In the programme, you will be able to explore all image design possibilities and find your style with artistic freedom. You will work on your projects and learn to handle customer orders professionally. The content of your studies will include advertising photography, press photography and photojournalism, artistic photography, product and documentary photography.

Upon completing your studies, you will have mastered various forms of photographic image design and possess extensive systematic, strategic and conceptual media skills.

You will work, for example, in the applied field of **portrait, fashion, editorial, advertising, product or reportage photography**.

Further professional fields arise within the new image media (**computer-generated imagery, Stereo3D, 360 x 180°, virtual & augmented reality**) or in **curation and image editing**, as well as **artistic photography**.

In addition, your Bachelor of Arts degree enables you to access numerous postgraduate and Master's degrees in Germany and abroad.

Whether portrait, architectural or product photography, whether in the studio, in the city or in nature - in your Bachelor's programme, we prepare you for photography in a wide variety of settings. In addition to theoretical background knowledge, e.g. on photographic techniques and history or image processing, we offer you practical modules in which you can expand your skills and (further) develop your own artistic style.

We will be happy to send you further information material, including the complete curriculum.
