### **Additional information**

## **Degree Overview**

During the course you will develop the skills required for the analysis of development issues, and to understand the interlinkages between statistics and econometrics, and develop expertise on international trade and exchange rate policies and related economic matters. Additionally, students have the opportunity to study a range of options covering project and programme management, public policy, and development policy.

## **Study Reasons**

On completion of this qualification, you may go on to work in an economics or finance policy capacity in government, the private sector, in development agencies (e.g. regional or national development banks) or in the third sector in a capacity relating to economics and finance (e.g. microfinance or enterprise support and development).
