Speciality

Pathways Available: Pre-Master's

Additional information

Degree Overview

This programme aims to develop your interest in, and knowledge and understanding of, Public Health Theory and Practice in a Global context. By global health we mean health issues impacting across the world including locally, regionally and nationally in Scotland and the UK.

The programme is relevant to UK and international students aiming to develop careers within public health as well as for those wishing to promote the health of the public as part of their current professional role. The programme takes a practical and applied approach and will equip you with the relevant transferable academic skills, professional/practical skills and knowledge to practice in a manner that achieves the purpose of public health i.e., dealing with pandemics, epidemics, reducing health inequalities and prolonging life through the implementation of a broad range of interventions to improve public health outcomes.
