Speciality

There aren't any pathways available

Additional information

Degree Overview

The Bachelor of Arts component will develop your ability to analyse, interpret, deliberate, draw conclusions, communicate, work as a team member and problem-solve. These skills are needed in the 21st-century workplace, and they will perfectly complement your study for the Bachelor of Behavioural Science.

You will study an Arts Major in a humanities or social science area of your choice, giving you in-depth, specialist knowledge and skills that will allow you to contribute effectively to society's cultural and intellectual life.

Our Majors include English Literature, Social Justice, Politics and International Relations, History, Archaeology, Theatre Studies, Journalism and Film and Screen Production. See the Program Requirements for the complete list.

The Bachelor of Behavioural Science is a unique program that combines elements of psychology, political science, cultural studies and sociology. Integrating specialised knowledge developed in these social science disciplines and with a strong focus on critical psychology, the program forges a connection between traditional psychology and social work. As a graduate, you will be equipped with the skills and knowledge to work with those who may be experiencing marginalisation or

disadvantage.

As part of the Bachelor of Behavioural Science, you will complete 12 Behavioural Science courses, including an Internship which offers you the chance to apply your theoretical knowledge and learn much more in a professional workplace.

Study Reasons

- Graduate job-ready with industry-specific skills and knowledge
- Benefit from a unique, personalised approach to education and pastoral care
- Lecturers are industry professionals and leaders in their field
